

How to use Windows Sandbox

Video I have followed: <https://www.youtube.com/watch?v=UywHb0rOHVI>

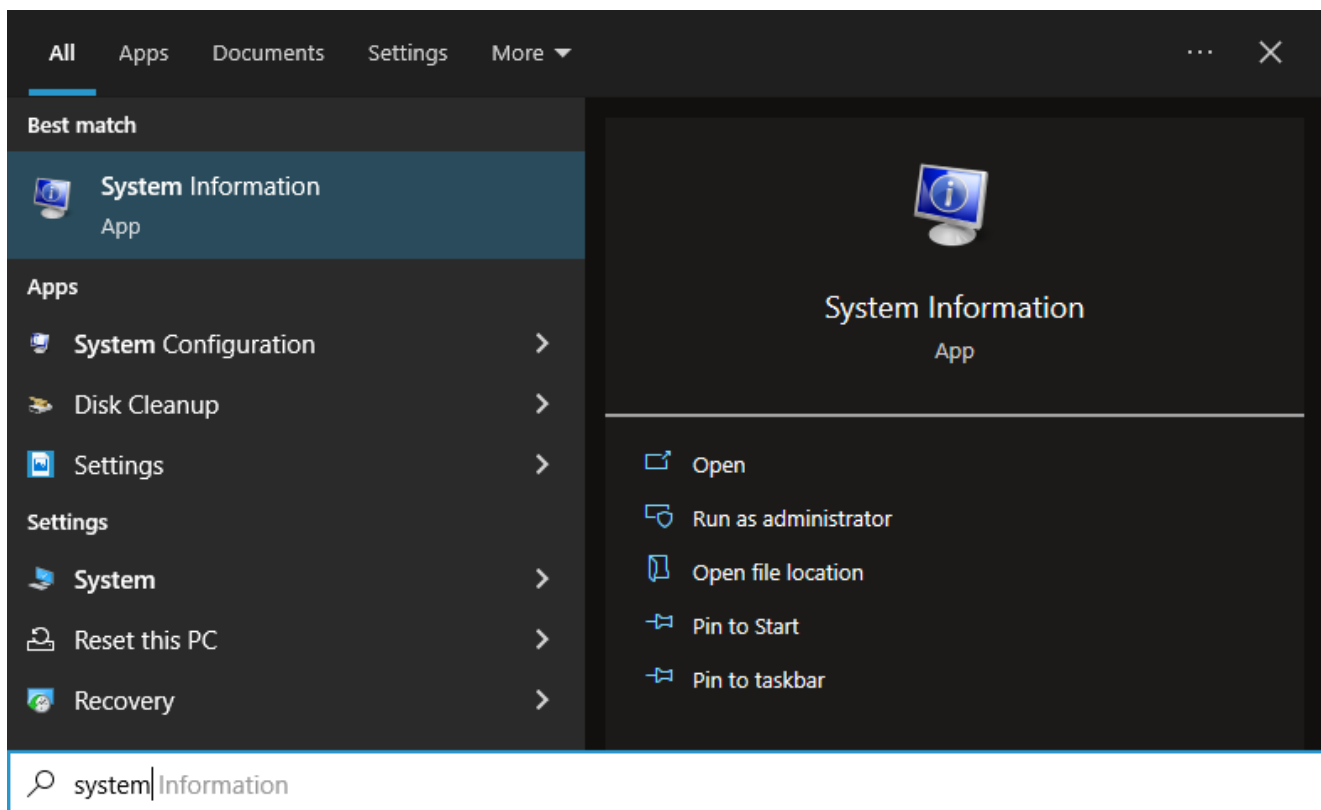

You need Windows Pro or Enterprise.

I. Find out what edition of Windows you have:

1. Win key + x.

2. Type system information in the search bar:

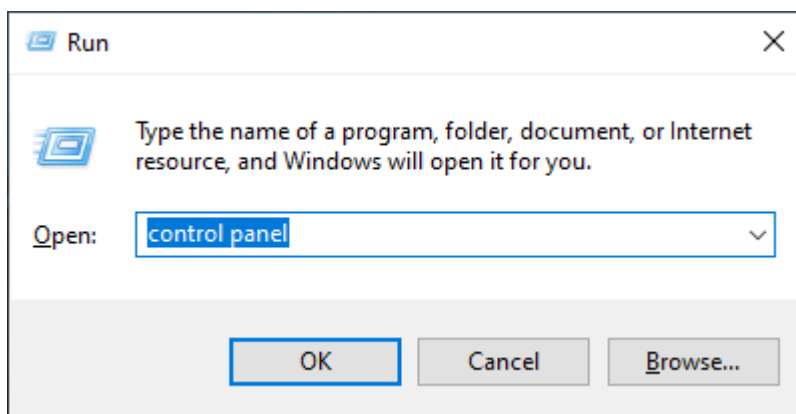

Under OS Name you can see the windows version.

II.

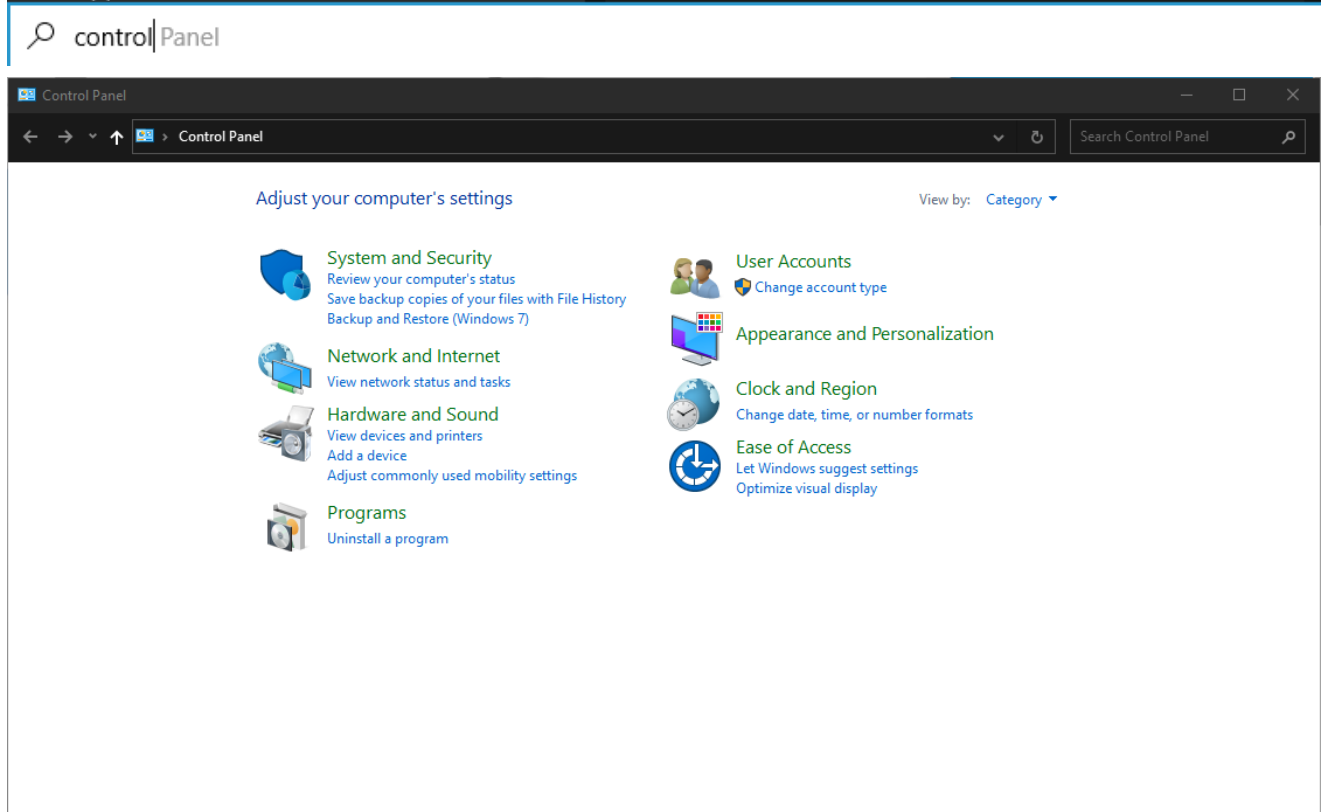

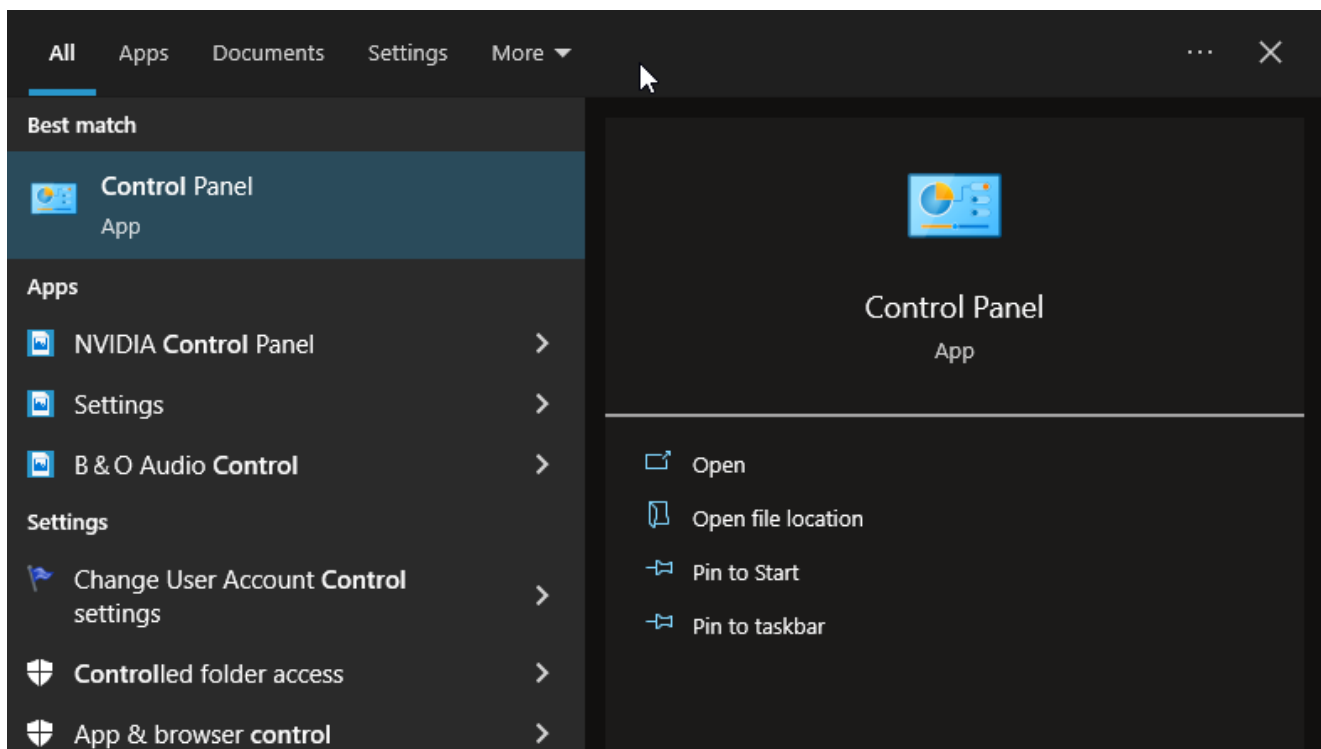

Windows Sandbox is a feature and it is not turned on by default.

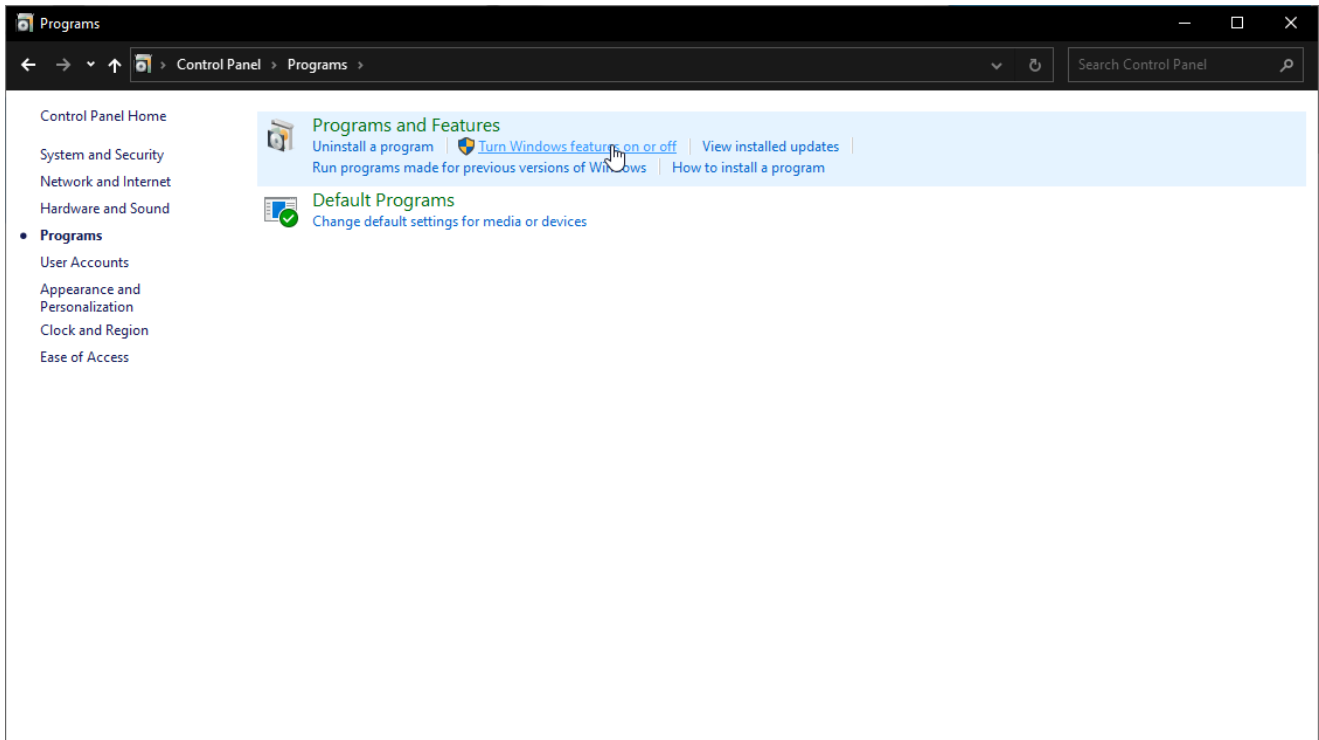

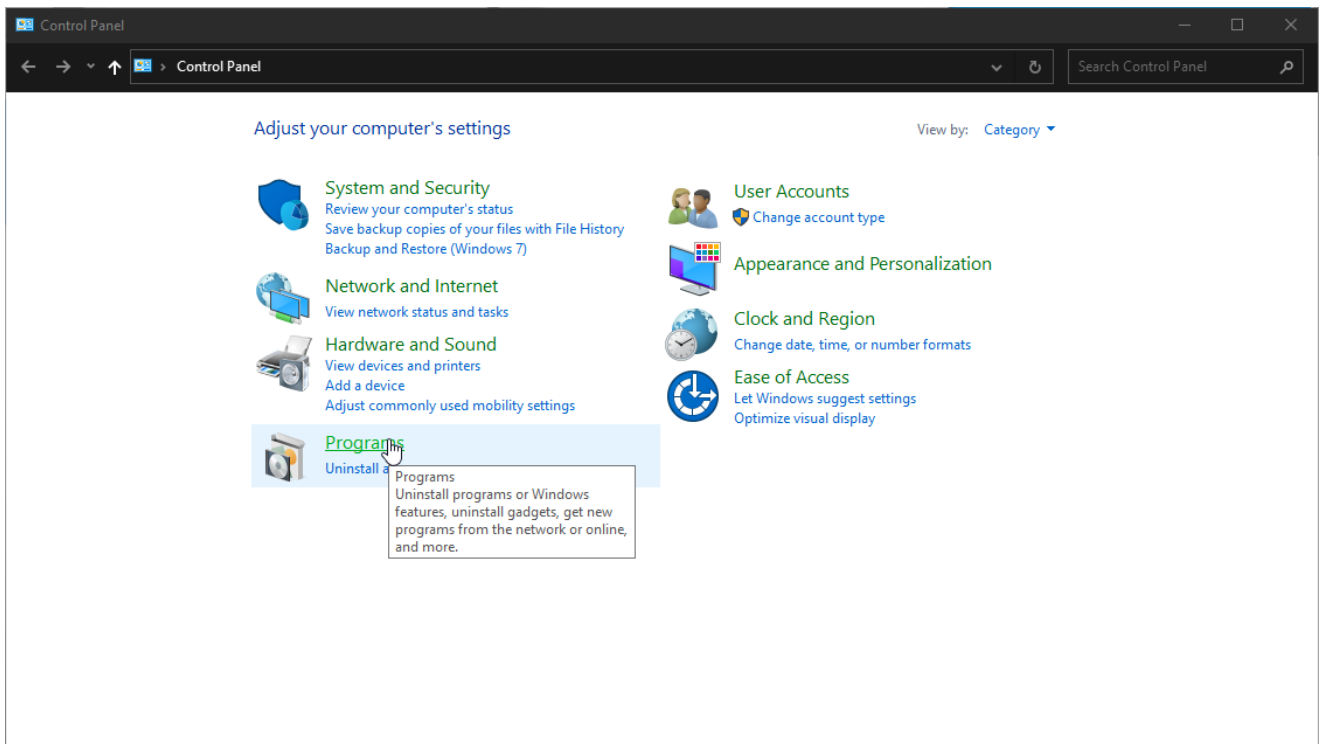

You need to get to the "Turn Windows features on or off" from Control Panel.

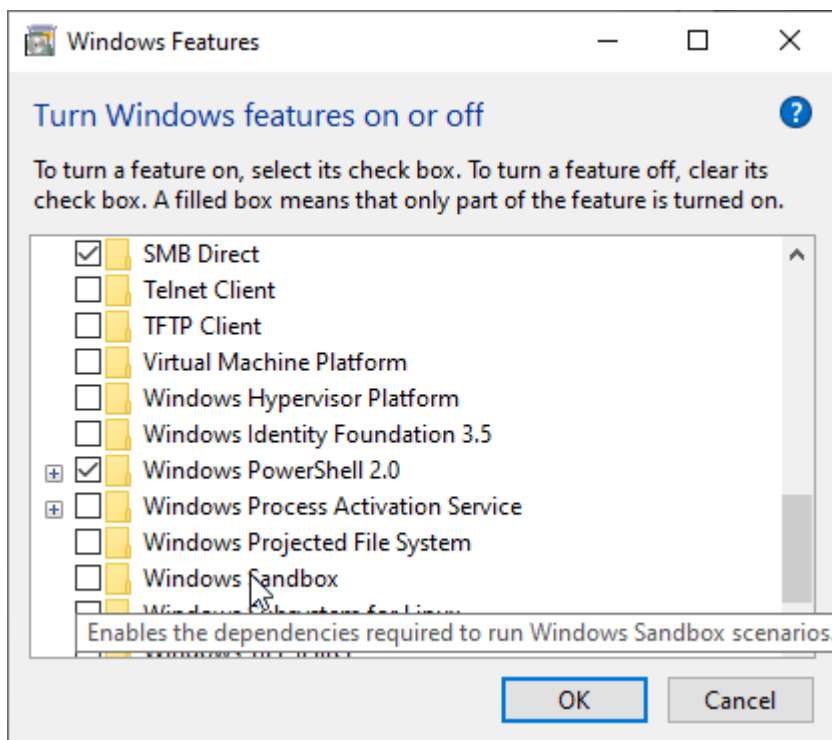

1. Open it through Run:

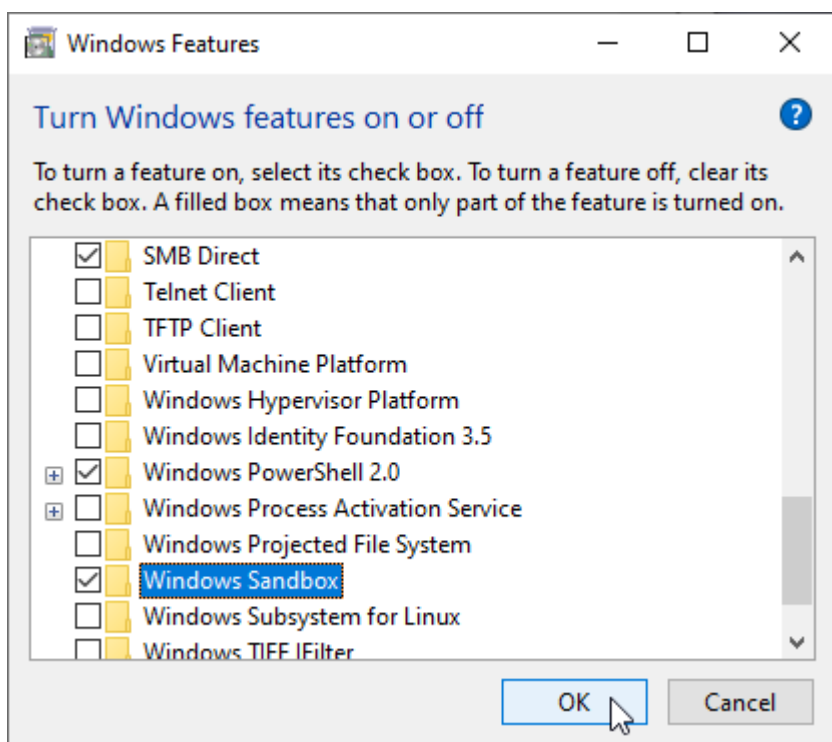

2. Type control panel in the search box:

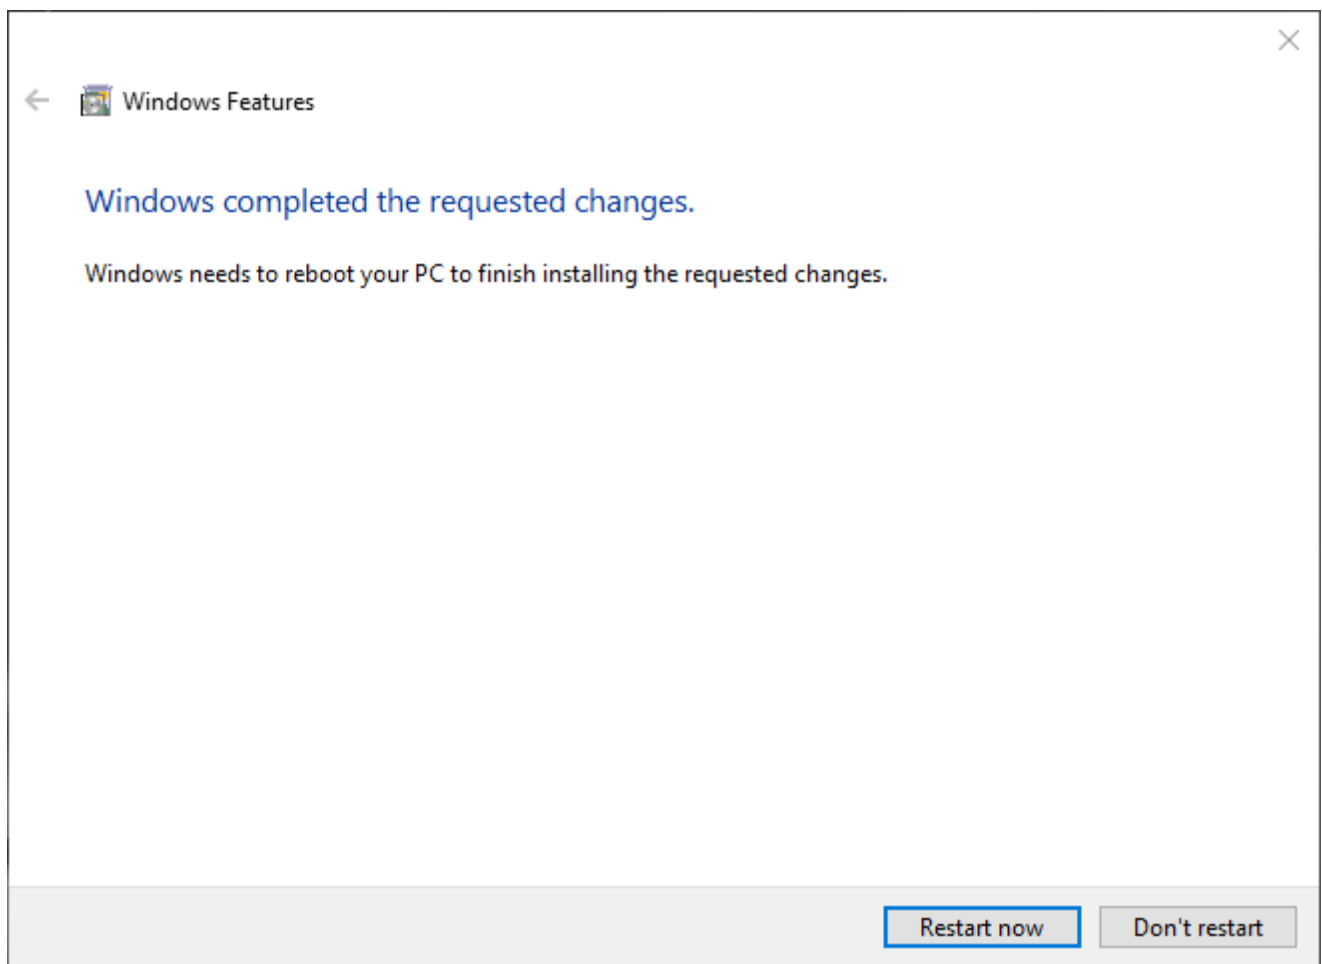

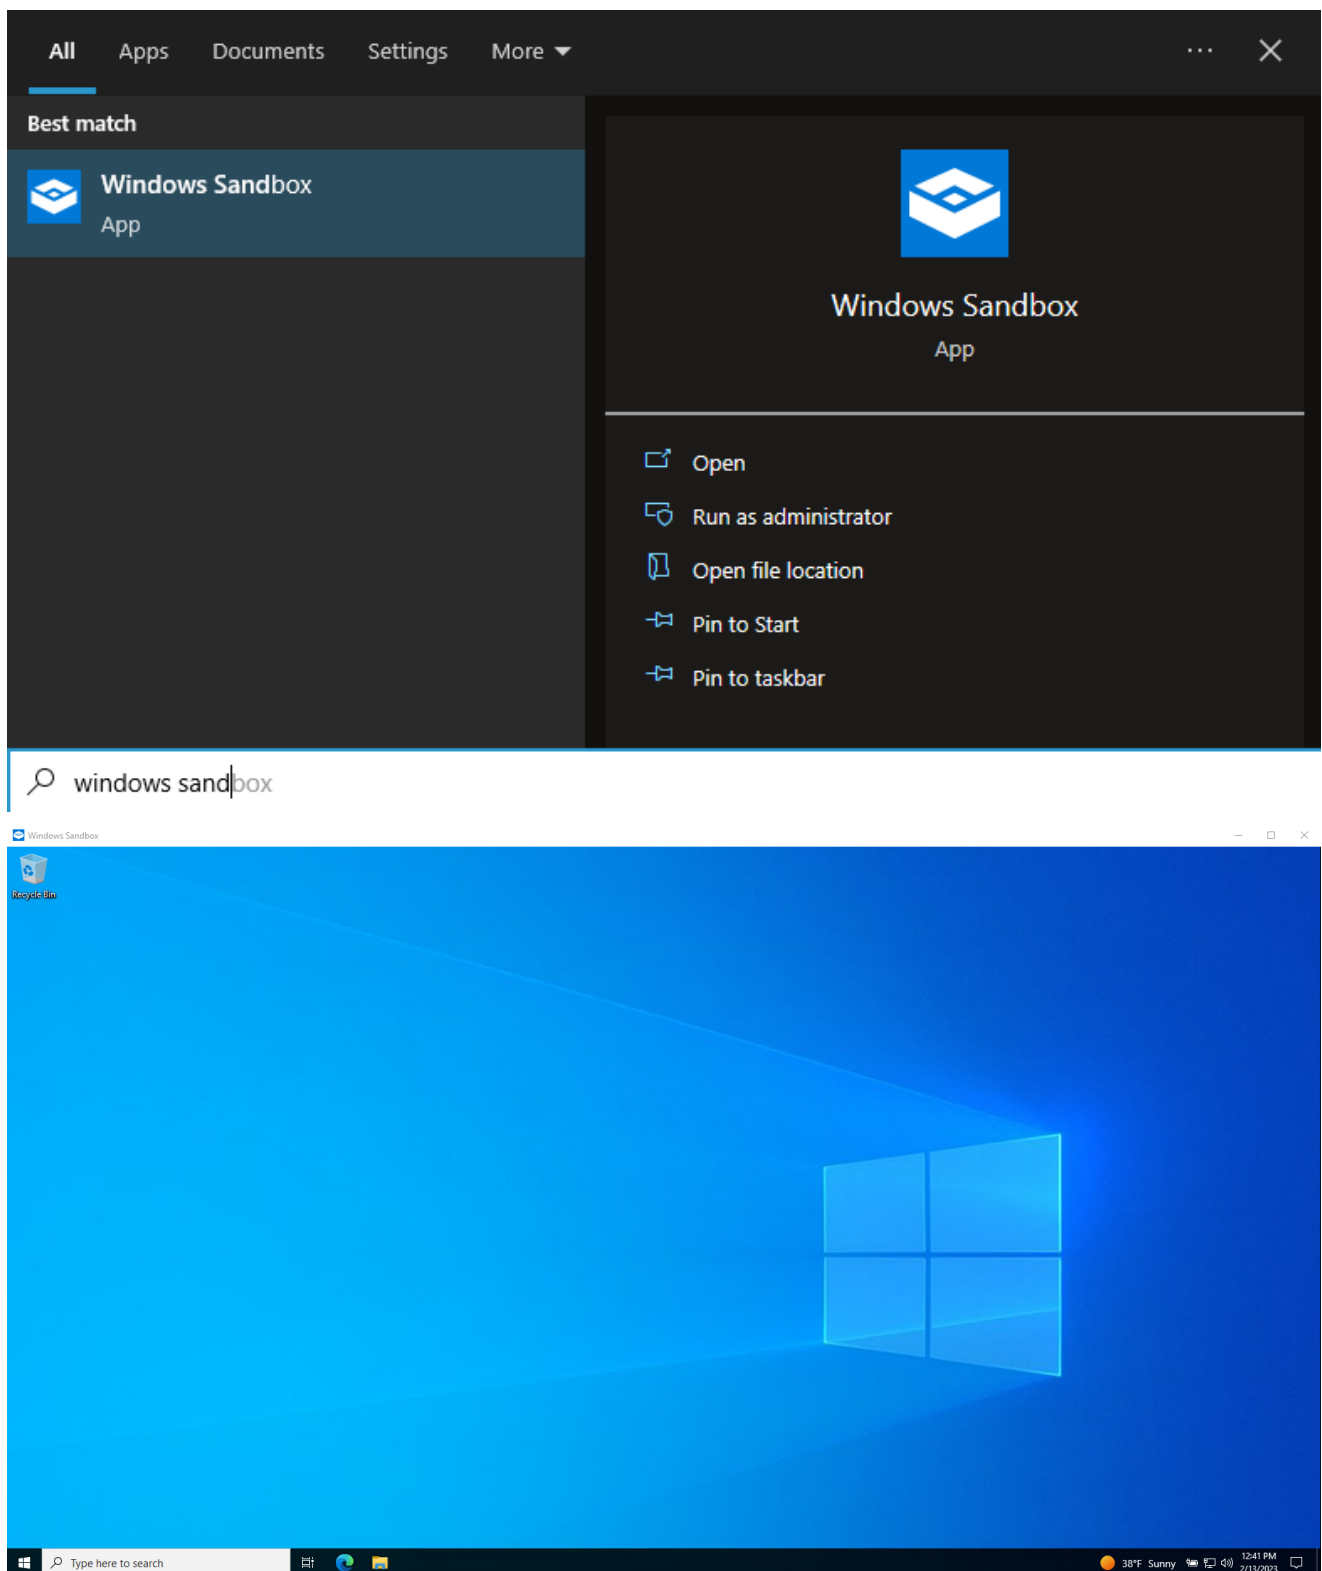

Enable it and press ok.

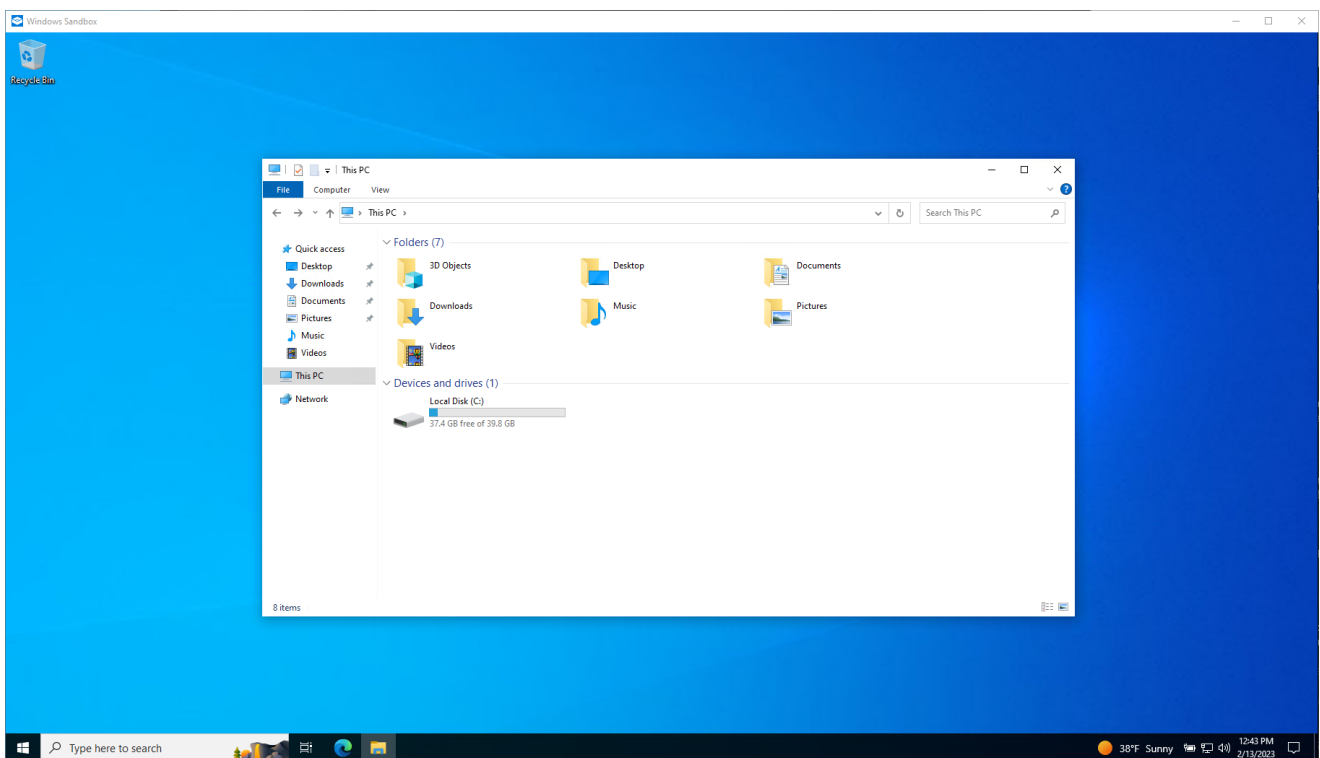

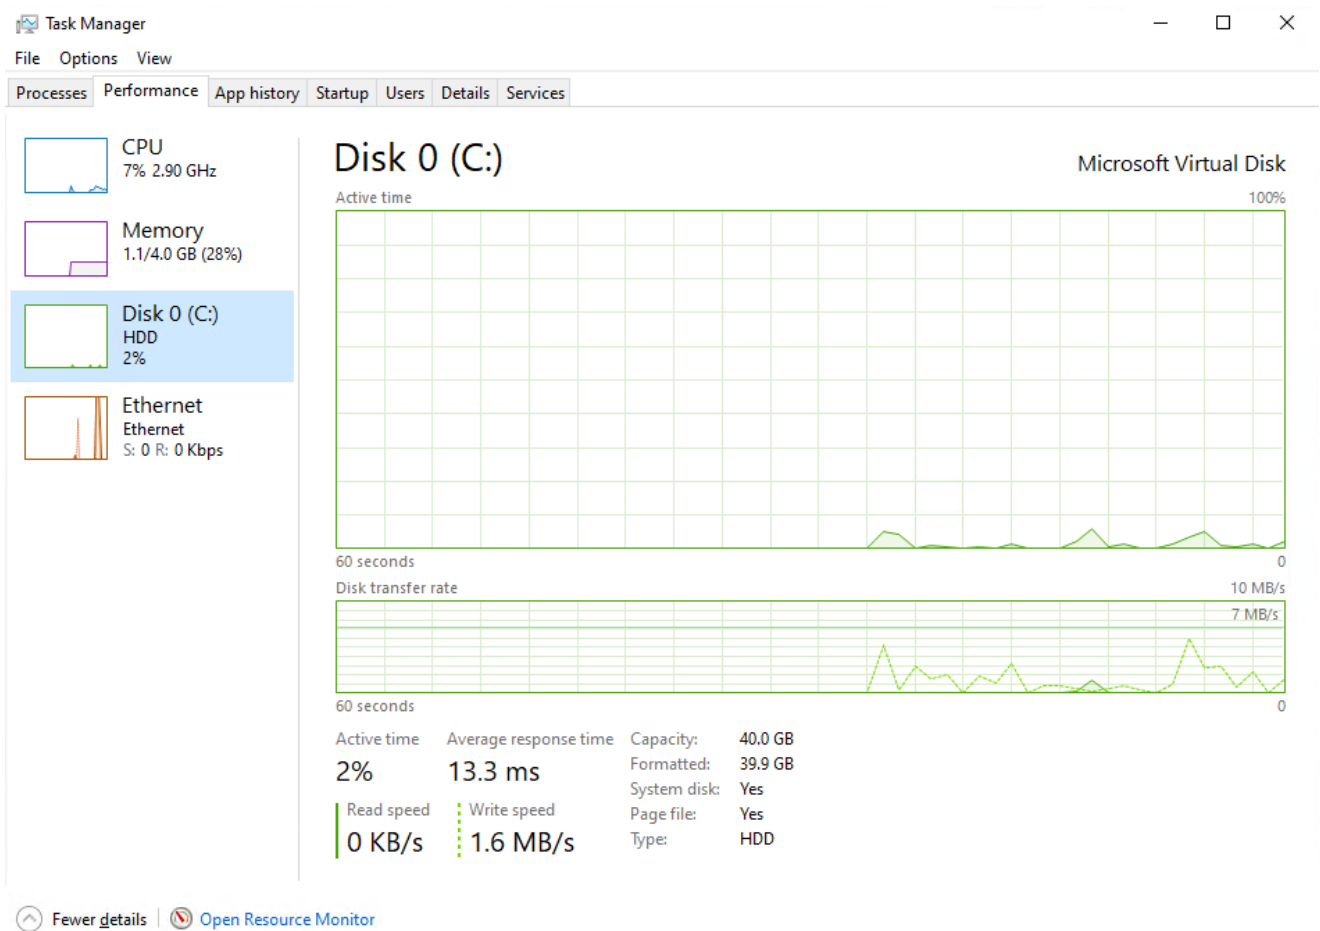

Restart the computer.

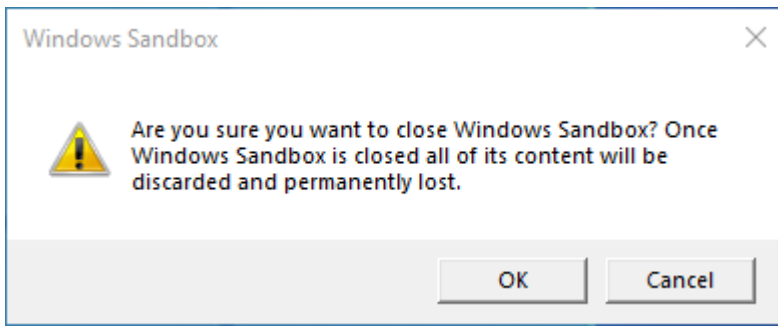

III. Launch the Windows Sandbox.

Resources of the sandbox:

If you close it , all the data that you have worked with it will be lost:

To work with host system documents , you need to CTRL+C the file you want to copy into the sandbox , and then click on the sandbox and CTRL+V to paste it.
